# **APPENDIX 5**

**Theis Analysis**

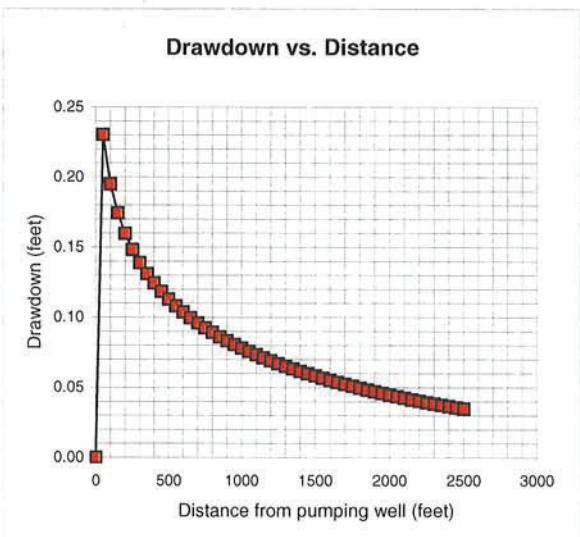

Program to calculate drawdown at different distances from a pumping well using the method of Theis (1935).

The method assumes one-dimensional steady-state flow with no lateral boundaries or vertical leakage.

Drawdown is calculated at different distances from the pumping well.

A time value is input for these calculations.

|  |                        | Distance<br>(feet) | u       | W(u) | Drawdown<br>(feet) | Drawdown<br>(inches) |
|--|------------------------|--------------------|---------|------|--------------------|----------------------|
